

MAGELLAN™ 9600i

Scanning Excellence with an AI Edge

THE NEXT GENERATION IS HERE

The #1 selling 'in counter' scanners for assisted and self-checkout are now even better. Fresh styling, rugged design, industry-leading scan performance and new options that enable Artificial Intelligence (AI) at the checkout put the Magellan 9600i portfolio in a class of its own.

With basic and advanced configurations, the 9600i scanner and scanner/scale is the perfect companion for Point of Sale (POS) systems in all high throughput checkout environments.

The ability to choose from 3 chassis lengths and multiple checkstand mount options allows customers to have a tailored solution that solves all of their assisted and self-checkout needs.

ENHANCING THE CASHIER OR CUSTOMER EXPERIENCE

Packed with the latest imaging technology, the 9600i scanners feature the largest scan volume in their class. This ensures fastest read rates and ease of use regardless of 1D, 2D, GS1 or Digimarc® symbologies.

The new Magellan scanners feature capacitive touch buttons and smooth surfaces to ensure the above counter areas are easy to clean and sanitize.

The 9600i offers an optional external mounted customer-facing reader enabling customers to scan mobile devices and coupons independent from a cashier in assisted lanes.

FEATURES FOR TODAY AND THE FUTURE

Magellan 9600i is powered by QuadVision™, a multi-core processor and multi-camera system with embedded Linux operating system to future-proof the platform. ScanSentry™ color camera options and neural processors result in a checkout that is fully enabled to support Artificial Intelligence (AI) software that will boost customer satisfaction and dramatically improve loss prevention.

FEATURES

- Magellan 9600i features QuadVision™, a powerful IMX8 multi-core processor utilizing 4 cameras (2 horizontal and 2 vertical) that will deliver multiple high resolution images for each scan. Combine the powerful processors, 5-sided image capture and Datalogic's legendary software and you have previously unheard of performance to decode the most difficult and damaged barcodes. In addition, two optional color cameras can be used for machine learning image capture and simultaneous video streaming via Ethernet or USB 3.0 for loss prevention in future releases.
- Optional built-in neural processors and accelerators enable trillions of operations per second inside the scanner eliminating a need for extra servers or cloud connections at the checkout.
- Be ready for the future GS1 Digital Link symbology which links valuable manufacturing and health safety details to each transaction.

INTEGRATED LOSS PREVENTION

ScaleSentry Technology

- Monitors the sides of the scale platter with an infrared (invisible) beam to detect if fruit or produce is misplaced on the scale platter causing the item to be under-weighted.

All-Weights™ Scale Platter

- The All-Weights scale platter design provides a total scanner weighing surface including the top of the bonnet, allowing the user to properly weigh produce that is too long to fit on the platter surface.

ScanSentry

- The 9600i can detect item movement across the platter and alert the POS system if no barcode was detected. This can be augmented with color cameras and Artificial Intelligence to create 'best in class' loss prevention and item recognition solutions.
